CANADIAN ENERGIES

PARTNERING FOR A GREENER TOMORROW

CANADIAN ENERGIES

Public Press Kit

Built in Canada. Engineered for North America.

Canadian Energies (legal name: Canadian Sustainable Energies Ltd.) is developing a proposed clean-energy manufacturing campus in Chatham-Kent, Ontario, spanning solar PV modules, sodium-ion battery cells and battery energy storage systems, alongside EPC delivery.

PROPOSED MANUFACTURING CAPACITY

3 GW | Planned solar PV module manufacturing capacity

5 GWh | Planned battery energy storage system manufacturing capacity

2 GWh | Planned battery-cell manufacturing capacity

Solar capacity is expressed in GW; battery-cell and BESS manufacturing capacity in GWh. These different units are not additive. Proposed project; capacity and timelines are subject to development and approvals. The proposed facility is a manufacturing campus, not a data centre.

Concept rendering of the proposed campus. Not a photograph of an operating facility.
